Insulin and its signaling systems are implicated in both central and peripheral mechanisms governing the ingestion, distribution, metabolism, and storage of nutrients in organisms ranging from worms to humans. Input from the environment regarding the availability and type of nutrients is sensed and integrated with humoral information (provided in part by insulin) regarding the sufficiency of ...

Introduction. The investigation of electrical brain stimulation to control central pain is long-standing and often empirical [1-3].Generally, the mechanism of pain relief is based on interfering with neuronal circuits responsible for pain processing or perception [4, 5] with synthetic brain stimulation patterns intended to override endogenous activity.

Brain stimulation patterns emulating endogenous ...
