The service-provider architectural model is based on service-provider functions, focusing on privacy and security, service delivery to customers (users), and billing. In this model, interactions between providers (the networks) and with users are compartmentalized. While this model represents a service-provider architecture, many enterprise networks

Rauda Scale Models since 1960

Architectural models bring a building down to a small scale for studying, to mock up, or to display. They can be especially useful for examining a building in all directions in a small environment, to catch any designs that might be unappealing once applied to a full scale building. Or envision changes, where it's

Architectural Models

An architectural model is a type of scale model – a physical representation of a structure – built to study aspects of an architectural design or to communicate design ideas. Depending on the purpose, models can be made from a variety of materials, including blocks, paper, and wood, and at a variety of scales.
