OLAP and data mining: What's the difference?

Warehousing Data: The Data Warehouse, Data Mining, and OLAP

Warehousing data is based on the premise that the quality of a manager's decisions is based, at least in part, on the quality of his information.

Warehousing Data: The Data

You can enrich your data warehouse with advance analytics using OLAP (On-Line Analytic Processing) and data mining.

Rather than having a separate OLAP or data mining engine, Oracle has integrated OLAP and data mining capabilities directly into the database server. Oracle OLAP and Oracle Data Mining

OLAP and Data Mining

OLAP applications are widely used by Data Mining techniques. In OLAP database there is aggregated, historical data, stored in multi-dimensional schemas (usually star schema). For example, a bank storing years of historical records of check deposits could

File Type PDF Data Warehousing Mining And Olap Management Alex Berson

use an OLAP database to provide reporting to business users.

OLTP vs. OLAP - Data Warehouse | Datawarehouse4u.info

Data Warehouse (OLAP) Operational Database (OLTP) 1: Involves historical processing of information. Involves day-to-day processing. 2: OLAP systems are used by knowledge workers such as

executives, managers
and analysts. OLTP
systems are used by
clerks, DBAs, or
database professionals.
3: Useful in analyzing
the business. Useful in
running the business. 4

Data Warehousing - OLAP -

Tutorialspoint

A Data warehouse
would extract
information from
multiple data sources
and formats like text

files, excel sheet, multimedia files, etc. The extracted data is cleaned and transformed. Data is loaded into an OLAP server (or OLAP cube) where information is pre-calculated in advance for further analysis.

What is OLAP? Cube, Operations & Types in Data Warehouse

Data mining is usually done by business users

File Type PDF Data Warehousing Mining And Olap Management Alex Berson

with the assistance of engineers. Data warehousing is a process which needs to occur before any data mining can take place. Data mining is the considered as a process of extracting data from large data sets. On the other hand, Data warehousing is the process of pooling all relevant data together.
