(4) indicates the position of the ENGINE ASSEMBLY DATE/SUFFIX CODE and partial VIN code information on the front of the block. (5) on the rear flange of the block, on the drivers side near the oil filter pad, is an alternate block location for some VIN codes.

Chevy V8 Engine Block and Head Casting Number Locations

Engine Code Stamping Numbers All engines are stamped with an engine ID code, consisting of assembly plant code, production date and suffix code. V8 codes are stamped on a pad just forward of the right side (passenger) cylinder head. 6 cylinder engines are stamped on the passenger side of the block behind the distributor.

Small Block Chevy Engine Block casting and code identification

Engine Casting Numbers Explained 1954-1962 Chevrolet The Casting Numbers to the right are found just below and to the right of the Distributor on the passenger side. They are notoriously very hard to read and often people make the mistake of thinking a '3' is an '8'. Clean the area thoroughly and use a nice bright flashlight.

GM Casting Numbers - Deve's TechNet

Locate the ID tag under coil attaching bolts for six-cylinder and some eight-cylinder engines. The tag is a series of numbers and letters etched in and used to decipher the year, make, and model of you engine. It is found underneath the bolts on the left or right side of the engine, near the front of the car.

How to Identify a Ford Motor: 11 Steps (with Pictures ...

Since it's fairly obvious that you're looking at an engine block, the important digits are the first four and last one, two, or even three digits in some cases. The numbers are cast into various locations on the block itself, depending on what family of blocks you are referencing, but should be fairly recognizable and usually pretty readable.

A Guide To Ford V8 Engine Block Casting Numbers, 1952-1996

Here is a list of casting numbers, along with their original applications. Locating and reading engine model and specification for Tecumseh's full engine line - 2004 production and later. The model number, spec number, date-of-manufacture and other engine related information will be printed on an I.D label on the engine. Reviewing the Engine ID Label

Tecumseh Engine Model Number and Spec Number Locator

The casting number is located on the driver's side, top rear of the engine block. The number on the front passenger side of the engine block will NOT tell you the displacement of the engine block. I used a lumber crayon to highlight my casting number.

V8 Chevy Engine Block Casting Number Location and List ...

The "352" casting appears on the outside of many (if not most) FE engine blocks on the rear of the block (behind the flywheel), with no regard to the real displacement. So a "352" block could really be a 332, 352, 390, 410, etc.. Measuring bore and stroke is the best way to confirm the actual engine displacement.

Ford V8 Engine Identification - FORDification.com

However, when it comes to Pontiac, this is simply the engine sequential number, generally referred to in service bulletins for updates in production. (The VIN is located on the passenger's side front of the block, down where the timing cover and the oil pan meet.)

How to identify Pontiac engine blocks | Hagerty Media

Casting numbers for the small-block Mopar and big-block Mopar engine blocks can be found on the left (driver's) side of the block, and will consist of seven numerals. These numbers are different than the stamped eight-digit number found on the right side of the engine. That number is the last eight digits of the Vehicle Identification Number.

A Guide To Mopar V8 Cylinder Head And Block Casting Numbers

In 68-69 model cars, the serial (VIN) number of the car the engine was installed in is stamped next to, or under the engine code ID. Starting in 1970, the serial number is stamped either above the oil filter, somewhere on the blockpad (in front of the cylinder head), or on the transmission flange somewhere.

How to decode Chevy Engine Codes

How to ID an LS Engine by VIN Chevrolet's LS and LS-based Gen III and Gen IV small-block engines are generally known by their RPO code. You can determine the RPO code if you have the VIN from the original vehicle. Locate the 8th digit of the VIN.

How to Identify an LS Engine

8-cylinder ENGINE NUMBER is on pad on front right hand side of the block behind the water pump. All Engine numbers start at 1001. The prefix letter identifies where the engine was built, model year and model type - "F" ~ Flint, "T" ~ Tonawanda.
