Rock Cycle There are 3 large classifications of rocks - igneous, metamorphic, and sedimentary. Each type of rock is formed differently and can change from one type to another over time. The way rocks are formed determines how we classify them.

Rock Cycle - 8TH GRADE SCIENCE

Igneous, metamorphic, and sedimentary: Boring rock names. But did you know one type can turn into another? And then back again? Roll with some rockin' knowledge.

Rock Cycle - BrainPOP

The concept of the rock cycle is attributed to James Hutton (1726–1797), the 18th-century founder of modern geology. The main idea is that rocks are continually changing from one type to another and back again, as forces inside the earth bring them closer to the surface (where they are weathered, eroded, and compacted) and forces on the earth sink them back down (where they are heated, pressed, and melted).
